SUMMARY

Web Developer with 3+ years of experience building and maintaining responsive, high-performance websites and web applications. Proficient in React and Next.js, with strong experience in WordPress, PHP, and full-stack development.

WORK EXPERIENCE

Web Developer, WopeDigital (Remote)

Sept. 2024 - Present

- Developed and maintained WordPress websites including business, e-commerce, membership, and booking sites, with custom PHP integrations and backend enhancements.
- Built custom plugins to extend site functionality and developed custom themes to match clients' specific branding and design requirements.

Freelance Web Developer (Remote)

Aug. 2023 - Sept. 2024

- Built and delivered 4+ websites for small businesses and clients in Kumasi, Ghana.

Freelance Technical Writer, FreeCodeCamp & ContentLab (Remote)

Sept. 2021 - Jul 2023

- Produced 6+ articles on programming and software development for freeCodeCamp and ContentLab, applying SEO best practices to improve content visibility.
-

PROJECTS

Digital Business Card Platform

- Built a digital business card platform with a custom analytics dashboard displaying total views, unique visits, and location data via Google Static Maps.
- Implemented Chart.js visit graphs with AJAX-based date range filtering for a smooth, no-reload dashboard experience.

DownNote - Full-Stack Markdown Editor

- Built a full-stack markdown editor with real-time preview, cloud sync, and a guest mode that allows users to start writing instantly without an account.
 - Implemented multi-provider authentication with NextAuth.js to enable seamless transition from guest to cloud-synced account via GitHub, Google, or email.
-

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript, TypeScript, PHP
 - **Frameworks & Libraries:** React, Next.js, Node.js, WordPress, WooCommerce, Prisma
 - **Databases:** PostgreSQL
 - **Tools:** VS Code, Figma, Canva, Photoshop, Photopea, Postman
